General Comment:I think it's important to be able to change something in order to make the public safer from things such as select agents and toxins. It's no mystery that the flu pandemic in 1918 posed a huge national security threat to the United States as well as the population of the world in itself. Based on the scientific observations and findings it seems as though this particular strain of the flu has the potential for great tragedy and thus should be treated as such.
